Member, <i>Institute for Advanced Study</i> , USA & Visiting fellow, <i>Perimeter Institute</i> , Canada	2022–
Postdoc fellow, Physics and Astronomy, <i>Johns Hopkins University</i> , USA & Visiting fellow, Centre of Data Science, <i>École Normale Supérieure</i> , France	2021–2022

EDUCATION

Ph.D. & M.A., Physics and Astronomy, <i>Johns Hopkins University</i> , USA Thesis title: Cosmology and Astrophysics with the Scattering Transform advisor: Brice Ménard	2017–2021
B.Sc. (with Honors), Astronomy, <i>Peking University</i> , China advisor: Eric W. Peng	2012–2016

RESEARCH INTEREST

I use innovative and interdisciplinary ideas to analyze survey data and acquire new physical understandings. My work led to the discovery of special stars powered by gravitational energy while they are freezing and the cosmological applications of a new statistic that borrows ideas from deep learning.

I am working on observational cosmology, stellar physics, extrasolar planets, turbulence, and interpretable machine learning.
